

Attributes of More Sustainable Raw Materials

Attributes of More Sustainable Raw Materials

Our journey toward responsible fashion is built on an integrated approach to products, services, and the value chain. At Lojas Renner S.A., we understand that reducing environmental impacts is an essential part of our business.

This commitment is reflected in the adoption of clear technical criteria for selecting raw materials, our ongoing pursuit of improvement, and the establishment of sourcing requirements, such as the use of certified cotton and certified viscose.

This document brings together the attributes of more sustainable raw materials that guide our product decisions, support our creative teams, and provide transparency to our value chain partners regarding the topics we consider priorities.
